Vision 2030 is a high-level, aspirational community visioning-for-planning initiative. Visioning is a collective process where the community can “imagine the future” and think about how we can shape different parts of Town with different sets of ideas.

The initiative will cover a broad range of topics, from public infrastructure and historic preservation to environmental resiliency and educational opportunities.

Led by the Metropolitan Area Planning Council (MAPC), the project is possible, in part, through a Technical Assistance Program grant from that organization.
